KEY FEATURES

Introduction

BoneXplore is an application that has a wearable gloves that consist of position tracking sensors or motion sensors.

The gloves connect wirelessly to a smartphone via Bluetooth to provide real-time data to the application about hand movement or gestures and it also capable on providing definition.

IoT Devices and Technology

Bluetooth Modules

Use to enable wireless communication with a smartphone or tablet. They facilitate the transmission of real-time data about hand movements or gestures to an application.

Sensors

Inertial Measurement Units (IMUs): useful for tracking hand movement and speed.

Haptic Feedback Devices

These devices provide tactile feedback (vibrations) to the user. They are commonly integrated into smart gloves to offer haptic responses when certain actions or gestures are recognized by the system.

03

Key Features

BoneXplore

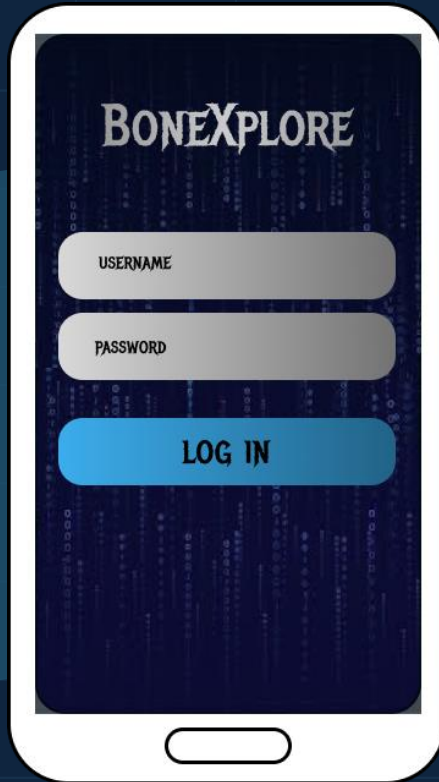

1. It can provide the definition of the skeletal body part touched by the users.
2. This application is user-friendly.
3. It has Bluetooth modules that enable wireless communication.
4. It has a wearable gloves consist of sensors that captures real-time motion data for tracking hand gestures.
5. It has Haptic Feedback Devices that provides vibration or force feedback to the gloves when certain actions or gestures are recognized by the system.
6. It enables wireless connectivity.
7. It provide virtual skeletal body on the screen that mirrors real-time movement of the use's hand.

04

APPLICATION
USER INTERFACE

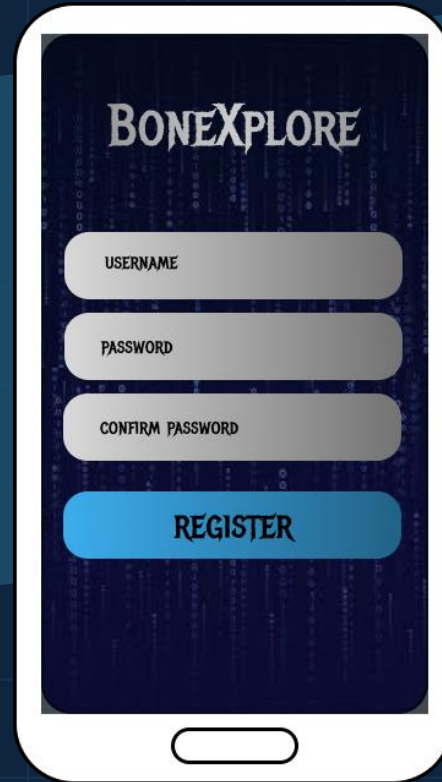

Log In form

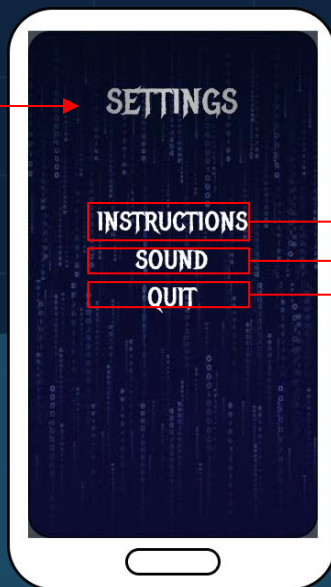

The Log In form is displayed on a smartphone screen with a dark blue background featuring a binary code pattern. At the top, the app name "BONEXPLORE" is written in a stylized, white, serif font. Below the app name, there are two input fields: "USERNAME" and "PASSWORD", both with light gray backgrounds and rounded corners. At the bottom of the form is a large, blue, rounded rectangular button with the text "LOG IN" in white, bold, sans-serif font. The smartphone has a white bezel and a home button at the bottom.

Registration form for new user

The Registration form is displayed on a smartphone screen with a dark blue background featuring a binary code pattern. At the top, the app name "BONEXPLORE" is written in a stylized, white, serif font. Below the app name, there are three input fields: "USERNAME", "PASSWORD", and "CONFIRM PASSWORD", all with light gray backgrounds and rounded corners. At the bottom of the form is a large, blue, rounded rectangular button with the text "REGISTER" in white, bold, sans-serif font. The smartphone has a white bezel and a home button at the bottom.

Once it has been connected to Bluetooth click on start exploring

BoneXplore provide virtual skeletal body on the screen that mirrors real-time movement of the use's hand.

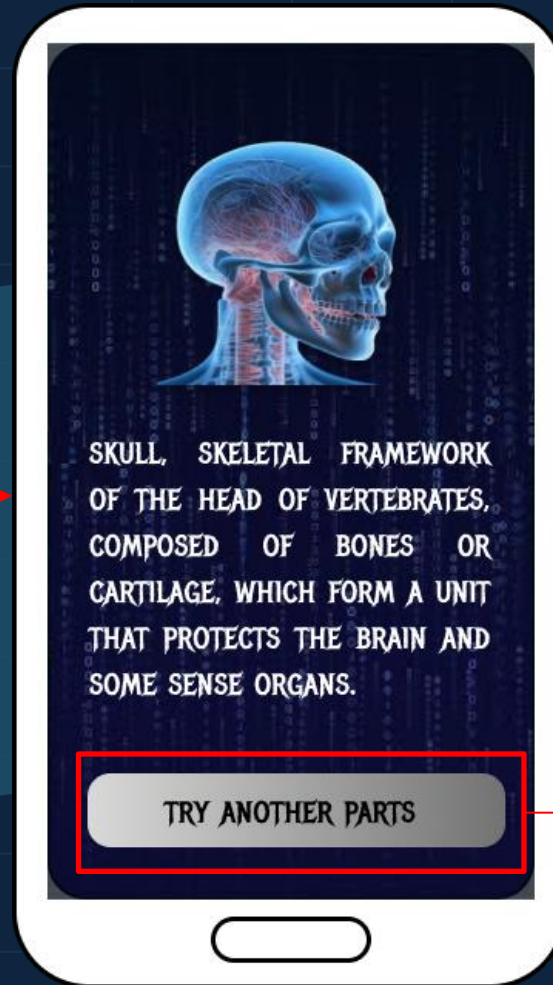

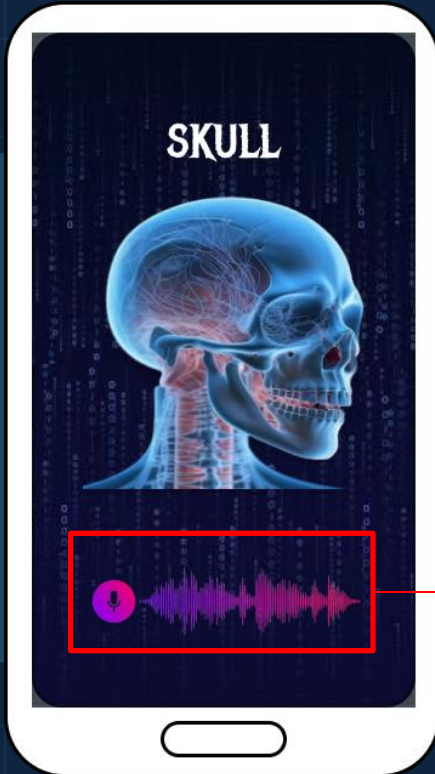

Once you have touched a part of the body, it will start scanning

When you feel the gloves vibrate, it means there is already a result

If you want to define the specific parts just hold the microphone and say the word above the image.

The BoneXplore app will start analyzing the word

Click on yes if you want to try again, No if not.

THANKYOU!!
